

# SURAPID

## Standard SJ-Victor , SJ-Victor MRL

**XTQ04-254D**  
LED+Acrylic light  
transmissive plate

**XTQ07-31**

**XTQ04-17    Optional**

Deep car or double pass door recommended

### COP STANDARD

**Display:** 10.4" (6.4" LED)

**Button:** BS34D (L)

**Control panel :** Hairline stainless steel

**10.4 "**  
(6.4 "LED)

**BS34D(L)**  
Shimmer button

**XCP2-A2**

### LOP STANDARD

**Display:** 4.3" BND, 4.3 LED

**Button:** BS34F

**Control panel :** Hairline stainless steel

**BS34F**

**XHB12-L**

## Optional

XTQ04-506D

XTQ04-230D

XTQ04-23

PVC series

XTQ07-68

XTQ07-71

XTQ07-210

Marble series

XTQ07-24

XTQ07-1306

XTQ07-23

XTQ06-01

XTQ06-01A

XTQ06-01B

XTQ06-16

## SJ-Victor MRL

*Make the biggest savings for your building space!*

V (m/s)	LOAD (Kg)							
	630	680	800	900	1000	1150	1350	1600
1.00	<b>50m/16F</b>							
1.50	<b>75m/32F</b>							
1.75	<b>90m/32F</b>							

## MRL Traction Machine

Mainly used for  
1050 ~ 1650Kg

### Type I for MRL

$630\text{kg} \leq Q \leq 1600\text{kg}$   
 $V \leq 1.75\text{m/s}$

GETM3.0H/  
GETM3.5H/  
GETM6.0H

### Type II for MRL

$630\text{kg} \leq Q \leq 1000\text{kg}$   
 $V \leq 1.75\text{m/s}$

GETM3.0D

### Type III for MRL

$800\text{kg} \leq Q \leq 1000\text{kg}$   
 $V \leq 1.75\text{m/s}$

GETM3.0G

Standard:  
Integrated control cabinet

SC1002 Series

## MRL Control System

### Intelligent control system

VVVF、The modular, all-computer design ensures efficient, comfortable and safe operation of the elevator.

#### Coverage:

Power: 7.5 ~ 37KW LOAD: 630 ~ 1600KG

Speed: 1.0 ~ 2.5m/s Floor: 64/64

Group Control: 8台

#### Features

- **Independent research and development**  
All control panels, inverters and displays are independently developed and have 106 patents.
- **Anti-disturbance capability**  
Suitable for a variety of mechanical systems as well as different mainframes
- **Integrated control system, miniaturized design**
- **32-bit digital signal processor**
- **Simple commissioning and remote control**
- **According to United Technologies Corporation standard**

More than 100 rigorous tests, product failure rate is less than 0.3%

## Door Operator

Safety protection, always protect your safety

### Safety

The door motor adopts permanent magnet synchronous motor, adopts AC variable frequency variable voltage control, precisely controls the output torque of the motor, low noise and high efficiency, and greatly saves energy consumption.

### Reliable operation and low failure rate

3 million reliability operation verification

Have a national laboratory

More than 300,000 sites are in use, and the failure rate is extremely low.

### Adapt to the complex of the construction site

Wide voltage design, can adapt to ±20% voltage fluctuation, anti-work voltage instability motor protection IP54, humidity 98%, can prevent worksite splashing, dust, mortar

### High efficiency, low noise and free debugging

The shortest opening time is 2S, the noise is only 50dB

## OTIS 51628 TEST

ALL PASSED

- Wide operating temperature range: -40 ° C ~ 85 ° C, motor overload capacity 150%

- Synchronous/asynchronous door knife selection function, power failure slow closing function, overvoltage and under voltage short circuit protection

- a) Input voltage : AC220V±20%;

- b) Frequency converter :

- Rated frequency : 50/60Hz;

- Rated current : 2.5A;

- Maximum current : 5.0A

- The output voltage : 0 ~ 220V;

- Output frequency : 0 ~ 50Hz

- c) Motor :

- Rated voltage : AC100/125V;

- Rated current : 0.73A/1.2A ;

- Rated speed : 180r/min;

- Rated torque : 2.3/5.0N·m;

- Rated power : 43.5/94.3W

- d) Encoder :

- Non-contact, high resolution, rotary position encoder in the 360° range

- Resolution: 12-bit absolute value output

- Output interface: Synchronous Serial Interface (SSI)

- Operating temperature : -5°C—40°C

## Light curtain door protection

### (upgraded to 194 bundles)

Using a sensitive density infrared light curtain, a light curtain protection safety net is formed at the elevator door, which can respond sensitively to any person or object entering its detection plane, with high safety performance and easy access.

## Three major safety components

SURAPID governor, safety gear and buffers are all independently developed and produced. The company has experienced experts in the development of elevator safety components, and at the same time configures advanced testing equipment and instruments in the industry to enhance safety testing.

## Function

Operating Function	
Complete set selection	LNS-Load Non Stop
Reinitializing operation	Corrected operation
Shaft position self-learning	Onboard debugging
Automatic elimination of reverse command	CBC-Cancel Error Calls
ADC-Advanced Door Closing	DOB/DCB-Door Open/Close Button
DOBL/DCBL-Door Open/Close Button Light	Separate control DHT of car and landing door
Door Re-opening	Automatic return to base floor
TCI-Top of Car inspection	Torque compensation on starting
Reverse instruction non-registration function	No positioning
Removal of current ramp	External call adhesion identification
Maintenance the reduction carrier	Car arrival bell
Open the door in advance	Automatic at leveling * optional
Duplex/Group control function * optional	Open door hold button * optional
Creep starting new	Auxiliary monitoring of balance coefficient new
One – key sorting of floor display new	
Security Function	
LWS-Overload Protection	Machinery Overheat Protection
DTO-Door Time Protection Open	Car door closing protection
DTC-Doo Time Protection Close	Door closing torque protection
Light Curtain Protection	Fault self-Diagnosis
Grid filter monitoring	Speed Detection
Brake Feedback & Detection	Contactor feedback detection function
Door lock short connection detection new	Door bypass device new
UCMP new	NTSD-End Protection new
Brake torque detection new	
Interface	
Direction pilot light outside the hall inside the car	16 Digital display * optional
LCD display * optional	BND display * optional
Car arrival gong * optional	

Emergency	
Emergency electric operation of the machine room	Emergency lighting in car
ALARB-Alarm bell	Internal communication
Fire display	Emergency firefighting operation
EFO-Emergency Fireman Operation * optional	EPO-Emergency Power Operation * optional
ARED-Automatic rescue device * optional	Integrated ARD function * optional
Integrated HSD function * optional	Self-leveling operation new
Leveling digging up new	
Energy Saving	
FLP-Fan and light protection	Lighting fan power saving mode
Stop switch: i.e. parking switch	Fan speed adjustable new
Special Operation	
ATT-Attendants Service	Reminding for attendant
Attendant bypass * optional	Lower selective collective * optional
Auto park	ANS-Anti-Nuisance car call protection * optional
Anti-crime protection * optional	Password Floor Service * optional
Intelligent IC card system * optional	Earthquake operation * optional
Restaurant waiting * optional	Over station warning * optional
Time setting * optional	Voice broadcast module * optional
Voice calm * optional	Air Condition * optional
Maintenance interference-free * optional	Independent service
VIP private service * optional	Overload reservation call order * optional
Optimization of door keeping * optional	Reset rescue function
Elevator dispatching pre-warning * new optional	Overload reservation call order * new optional
Waterproof detection contact * new optional	Rush hour service * new optional
Destination floor park prompt * new optional	Mainboard dynamic password * new optional
Over current pre-detection new	
Monitoring	
BA-Building monitor ports * optional	Building monitoring serial communication interface * optional
Residential area monitoring system * optional	REM * optional
BA interface board * optional	

## SJ-Victor MRL Configuration

系统名称 ITEM	部件名称 NAME	品牌 BRAND	产地 ORIGIN
I 控制系统 CONTROL SYSTEM	控制柜 SC1002	速捷电梯	成都
	SC1002 CONTROLLER	SURAPID	CHENGDU
	微机系统控制板	杭州优迈	杭州
	CONTROL BOARD	HANGZHOU OPTIMAX	HANGZHOU
	驱动器/变频器	杭州优迈	杭州
